### FOR IMMEDIATE RELEASE

24 November 2009

### **Thermotron Recognized for Excellence by Raytheon Space and Airborne Systems**

[Holland, Michigan] – Raytheon Company presented supplier excellence awards to thirty companies for their exceptional performance in supporting the company’s Space and Airborne Systems (SAS) business.

The winning suppliers represent less than one percent of Raytheon SAS’s supplier base. They were chosen for meeting demanding standards in the areas of quality and delivery performance, customer satisfaction, and total business and financial health. Evaluations of their performance by the Raytheon buyers and material program managers who deal with them every day were also part of the selection process. Awards were presented at the 3-, 4- and 5-Star level, and Thermotron was one of only five companies to receive a 4 -Star award.

“Thermotron is honored to receive this prestigious award, recognizing us for exceptional support to Raytheon and to the men and women who serve,” said Lynn Ternan, Thermotron Vice President of Sales, who was on-hand to accept the award.

“Our team at Thermotron is dedicated to the highest standards of quality and service and we are honored to be recognized by Raytheon Space and Airborne Systems,” said Dan O’Keefe, company president.

[Thermotron](#) is North America’s largest manufacturer of high performance environmental test equipment. Products including [Temperature & Humidity Test Chambers](#), [Vibration Test Systems](#), [Accelerated Stress Test Systems for HALT & HASS](#), and [Functional Test & Measurement Solutions](#) are integral components used to prove and improve the reliability of a wide range of products.
