

## STOCK EXPRESS

### Critical delivery needs? We have your solution!

If you need test equipment quickly, then Thermotron's Stock Express program is your answer. We are constantly building up our most popular models for stock, providing you the opportunity to reduce wait times with the purchase of chambers and vibration systems already in production. If an urgent need arises, such as end-of-year budgets, critical product development timelines, or quality control issues, Thermotron has you covered with Stock Express.

Stock Express chambers come equipped with standard Thermotron features, including our in-house controllers specifically designed and programmed to optimize the testing capabilities of your chamber. Customization and the addition of optional accessories are available for these units, but please note the shipping time and price will be affected.

### Commonly Stocked Models \*

Benchtop Models	Workspace Volume	Temperature Range	Humidity Range
SM-1.0	0.89 ft <sup>3</sup> (25L)	-40°C to 130°C	20% to 95%
